

Resolution: same harness, three scales

Panel B: workshop_set_v2 — 250 P + 250 B across 400 disease genes; Brandes-matching label scope (canonical text + Conflicting via ClinSigSimple), canonical-isoform-validated. LLR AUROC 0.925 (CI95 0.900–0.947) — within noise of Brandes 2023's 0.905.

ESM-1b zero-shot, ClinVar missense (all genes).
The ceiling this harness climbs toward.
